The Philadelphia Inquirer of Monday publishes a long letter from a correspondent who has explored the filthy quarters of the Washington jail, gathering full particulars of the condition of the contrabands and other persons who are imprisoned there. We copy: WRETCHED CONDITION OF THE JAIL.

The Victims in Jail at Washington

The jail is a miserable structure, devoid of exterior establishments or architectural taste, and designed apparently with a view to dampness and had ventilation. It was originally built to contain fifty, but now has 250, and there have been at times over 300 confined there, not one of whom but what was said by the physicians to have some contagious disease; and during the last summer, when the weather was warm, most still have the typhoid fever. The most telling fact is that the doctor, a very humane man is compelled to drug them inside and Allxander Hamilton, Jr., esq. E. F. Sanderson, esq. Allxander Hamilton, Jr. esq. out, to keep down disease and vermin; and even then he does not succeed entirely. On each story of the jail is a corridor 20 feet wide by 40 long, with two narrow cells

at each end. Opening on this corridor are other portions of the building are narrow passages, five feet wide and 25 feet long, upon which open on three cells. upon which open on three cells. In each of these, only ten feet long and eight wide, ten prisoners sleep, and during the day the whole 30 have merely the liberty of moving through the 20 feet of crowded and fetid passageway, without books, papers, work or any mental distraction beyond the idle works of their companions. On the arrival of a visitor they rush to their inner door.

The great resources of the Liverpool and London Fire and Life Insurance Company, and the high character of its directors, together with the personal liability of its shareholders, entitle it, in our opinion, to the highest confidence. of a visitor they rush to their inner door, too rejoiced at any novelty to experience shame at being scanned.

Twice a day the inmates, with the exception of the sick, are taken down in gangs into the prison yard, where they partially wash themselves at a pump, and these short moments are all that are allowed, in sum mer, or winter, of fresh air or the light of heaven. In this public space, ablutions of the entire person are rarely indulged in, and the washing of clothes being seldom performed, they drop away in rags, and are filled with fleas and vermin of the most detestable character. Instead of a private edy for this latter is red precipitate and mercurial salve, well rubbed on the hair and skin.

In Battle.

"That could scarcely be my nephew," said Giles Gosling, (in Scott's novel of Kenilworth) when he heard his relative praised for great bravery; " for he had not the courage of a hen-partridge." "Oh, many a man finds courage in the

wars," replied the stranger. And many a man, like honest Giles, has been tempted to exclaim, on hearing some tamiliar name coupled with brave deeds, There must be some mistake about it! He never had any courage that his friends knew of; and everybody wondered at his spirit when he declared his intention to go

and fight." So little do we know these mild-tempered, good-natured fellows around us, whom cir. FURNITURE WAREHOUSE cumstances have never yet put to the proof. To think of them coolly standing fire, with the blaze of the enemy's guns before them and the bullets whistling around, or to magine them furiously charging with the bayonet, seems preposterous.

And it is probable that they scarcely

now themselves any better, until the time of trial arrives. We have the honor of knowing several individuals who fought bravely at Bull Run; and their universal testimony is, that—with the exception of the panic, which did not begin with the troops, though it afterwards swept them away-their principal fear was before the engagement. They were afraid they should be afraid. They lacked courage in their own courage. But as soon as the real terrors of battle began, their nerves became steady. A strange excitement burned in their veius, and made them indifferent to danger. Me. who could never before look upon blood without horror, saw the carnage around them unmoved. They relate striking anecdotes of each other. One youthful student, who had always been noted for his gentle manners, loaded and fired as steadily and with as much precision as if he had been shooting at a mark; and while his comrades were falling around him, at every shot he brought down one of the enemy. Another volunteer suddenly stopped firing in the midst of the action, and pulled off his trowsers. He was asked what he intended to do. He said nothing, but kicked off his drawers. Then putting on

his trowsers again, he said-"Them plaguy drawers have been bothering me all day; and now I shall feel bet-

And resuming his gun, he coolly picked off one of the enemy. We have heard many such personal anecdotes, which go to show that there is in most men a strong latent courage, which actual danger brings out, and makes heroes of them as much to their own astonish-

ment as anybody's.—True Flag.

OUR COMMERCIAL TREATY WITH CANADA. -The tone which the journals and authorities of Canada have adopted towards this country, and the menacing warlike preparations in progress there and tauntingly referred to on every possible occasion, demand some decisive notice from our government. There is no greater secession sympathizer than Canada, and no other neutral province harbors so many rebel refugees and treats them to so assiduous a welcome. Congress ought, in view of these facts, to immediately repeal our reciprocity treaty with Canada.

TERRIBLE DEATH .-- A man named John Champion, who has been engaged as a switchman and car coupler on the Michigan Southern railroad for a number of years, was killed between four and five o'clock yesterday afternoon. He was uncoupling a ten-

sponsible authority at Washington, informs us that the lancers are to be filled up at once, and will be ordered to Washington. This settles conclusively any doubt that

We have made the above Reduction in Prices with the two-fold view of benefitting the public and ourselves.
The public have been swindled by spurious machines made in indication of ours. The metal in them, from the fron carting to the smallest piece, is of poor quality.
Their makers have not the means to do their work well. Their makers have not the means to do their work well. They are hid away in secret places, where it would be impossible to have at their command the proper mechanical appliances. It is only by doing a great business, and having extensive manufacturing establishments, that good machines can be made at moderate prices. The best designed machines, hadly Made, are always inable to get out of order, and are sure to cost considerable trouble and money to keep them in repair. The qualities to be looked for in a machine are: certainty of correct action at all rates of speed, immplicity of construction, great discability and rapidity of operation, with the least labor. Machines to combine these excential qualities, must be made of the best metal and finished to perfection. We have the ways and means, on a grand scale, to do this.

The purchasers of machines, whose daily bread it may concern, will find that those having the above

The purchasers of machines, whose daily bread it may concern, will find that those having the above qualities not only work well at rupid as well as slow rates of speed, but last long in the finest possible working order. DAILY GAZETTE.

The Victims in Jail at Washington

The Philadelphia Inquirer of Monday publishes a long letter from a correspondent who has explored the filthy quarters of the Washington jail, gathering full particulars of the condition of the contrabands and other persons who are imprisoned there. We copy: WRETCHED CONDITION OF THE JAIL.

The jail is a miserable structure, devoid of exterior establishments or architectural taste, and designed apparently with a view to dampness and bad ventilation. It was originally built to contain fifty, but now has 250, and there have been at times over 300 confined there, not one of whom but what was said by the physicians to have some contagious disease; and during the last summer, when the weather was warm, most of them had the measles, and a number still have the typhoid fever. The most tell-ing fact is that the doctor, a very humane man is compelled to drug them inside and out, to keep down disease and vermin; and even then he does not succeed entirely.

On each story of the jail is a corridor 20 two stone cells, each 20 feet square. In other portions of the building are narrow passages, five feet wide and 25 feet long, passages, her reet wate and 25 feet long, upon which open on three cells. In each of these, only ten feet long and eight wide, ten prisoners sleep, and during the day the whole 30 have merely the liberty of moving through the 20 feet of crowded and fetid passageway, without books, papers, work or any mental distraction beyond the idle works of their companions. On the arrival of a visitor they rush to their inner door, too rejoiced at any novelty to experience

Twice a day the inmates, with the exception of the sick, are taken down in gangs into the prison yard, where they partially wash themselves at a pump, and these short moments are all that are allowed, in sum mer, or winter, of fresh air or the light of heaven. In this public space, ablutions of the entire person are rarely indulged in, and the washing of clothes being seldom per-formed, they drop away in rags, and are filled with fleas and vermin of the most detestable character. Instead of a private bath-room and plenty of soap, the jail rem-edy for this latter is red precipitate and mercurial salve, well rubbed on the hair

In Battle.

"That could scarcely be my nephew," said Giles Gosling, (in Scott's novel of Kenilworth) when he heard his relative praised for great bravery; "for he had not the courage of a hen partridge." "Oh, many a man finds courage in the

wars," replied the stranger.
And many a man, like honest Giles, has been tempted to exclaim, on hearing some familiar name coupled with brave deeds. There must be some mistake about it He never had any courage that his friends knew of; and everybody wondered at his spirit when he declared his intention to go and fight."

So little do we know these mild-tempered good-natured fellows around us, whom circumstances have never yet put to the proof. To think of them coolly standing fire, with the blaze of the enemy's guos before them and the bullets whistling around, or to imagine them furiously charging with the

bayonet, seems preposterous.

And it is probable that they scarcely know themselves any better, until the time of trial arrives. We have the honor of knowing several individuals who fought bravely at Bull Run; and their universal estimony is, that—with the exception of the panic, which did not begin with the troops, though it afterwards swept them away-their principal fear was before the engagement. They were afraid they should be afraid. They lacked courage in their They were afraid they should own courage. But as soon as the real terrors of battle began, their nerves became steady. A strange excitement burned in their veins, and made them indifferent to danger. Men who could never before look upon blood without horror, saw the carnage around them unmoved. They relate striking anecdotes of each other. One youth ful student, who had always been noted for his gentle manners, loaded and fired as steadily and with as much precision as if he had been shooting at a mark; and while his comrades were falling around him, at every shot he brought down one of the enemy. Another volunteer suddenly stopped firing in the midst of the action, and pulled off his trowsers. He was asked what he intended to do. He said nothing, but kicked off his drawers. Then putting on

his trowsers again, he said—
"Them plaguy drawers have been bothering me all day; and now I shall feel better.

And resuming his gun, he coolly picked off one of the enemy. We have heard many such personal an-

ecdotes, which go to show that there is in most men a strong latent courage, which actual danger brings out, and makes heroes of them as much to their own astonishment as anybody's .- True Flag.

OUR COMMERCIAL TREATY WITH CANADA -The tone which the journals and authorities of Canada have adopted towards this country, and the menacing warlike prepara-tions in progress there and tauntingly re ferred to on every possible occasion, demand some decisive notice from our government. There is no greater sccession sympathizer han Canada, and no other neutral province harbors so many rebel refugees and treats them to so assiduous a welcome. Congress ought, in view of these facts, to immediate y repeal our reciprocity treaty with Canada

TERRIBLE DEATH .- A man named John Champion, who has been engaged as a switch-man and car coupler on the Michigan Southern railroad for a number of years, was killed between four and five o'clock yesterday afternoon. He was uncoupling a ten-der from a car, in motion, and falling, was ran over lengthwise, his body being crushed to a jelly. Coroner James held an inquest last night .- Chicago Journal of 14th.

THE LANCERS TO BE FILLED AT ONCE AND ORDERED TO WASHINGTON.—A dispatch to the editor of this paper, from entirely re-sponsible authority at Washington, informs us that the lancers are to be filled up at once, and will be ordered to Washington once, and will be ordered to washington. This settles conclusively any doubt that may have yet remained concerning this fine regiment being called into service.—De-

in Carriage Trimming, Boot and Shoe Making, Harness Making, stc., etc. They are of extra size, with an arm long enough to take under it and stitch the largest sized dashes. There is scarcely any part of a Trimmers' stitching that cannot be better done with them than by hand; so, too, the saving of time and labor is very great. The table under these machines is 24 inches long, and the shuttle will held six times the unual quantity of thread. The large machines work as fast as small ones.

We would ask for our Lotter A machines, the special attention of Vest Makers and Dress Makers, and all those who want machines for Light Manufacturing purposes. They embody the principles of the standard machines, making like them, the interlock stitch, and are destined to be as celebrated for Family Sewing and light manufacturing purposes as our standard machines are for manufacturing purposes in general.

We have made the above Reduction in Prices with the two-fold view of benefitting the public hard ourselves. The public have been swindled by spurious machines made in initation of ours. The metal in them, from the irun casting to the smallest piece, is of poor quality. Their makers have not the means to do their work well. They are hid away in secret places, where it would be impossible to have at their command the proper mechanical appliances. It is only by doing a great fueliness, and having extensive manufacturing establishments, that good machines can be made at moderate prices. The best designed machines, Badly Made, are always hable to get out of order, and are sure to cost considerable trouble and money to keep them in repair. The qualities to be looked for in a machine are: containly of correct action at all rates of speed, simplicity of construction, great durability and rapidity of operation, with the best labor. Machines to combine these evential qualities, must be made of the best metal and finished to prefer them. We have the ways and

tout the least labor. Machines to combine these escential qualities, must be made of the best meds and invisited to perfection. We have the ways and means, on a grand scale, to do this.

The purchasors of machines, whose daily bread it may concern, will find that those having the above qualities not only work well at rapid as well as slow rates of speed, but less long in the finest possible working order. Our machines, as made by us, will carnow more money with less labor than any others, whether in imitation of ours or not. In fact, they are cheaper than any other machine as a gift.

Where breathes the fee but falls before us? With Freedom's soil beneath our feet, And Freedom's banner streaming o'er us!

Threstening Aspect of Our Foreign Affairs.

The foreign news looks warlike. It is evident that England means to menace our prepare the way for the independence of lican. the southern states. This has been her policy from the beginning-an independ-England for this purpose. The combinawell startle our people.

Let us look upon these new troubles calmly and resolutely. No man can die but once, and in the sacred cause of national existence and independence, no death can be more glorious. If one-half of our people perish in battle, it would be better than to quail before the insolence of foreign despots who seek to divide and enslave us. Let England and France take care! We can raise a storm in the world that will sweep their rotten governments from the parth. The nations have long enough suffered from the tyrauny of these two powers, which are without friends, except the mock friendship which fear produces.

In the great whirlpool which such a war would produce, all nations would be involved, and they would naturally take sides with us against the overgrown and monstrons monopolis on sea and land by which France and England rule the commerce and labor of the world. It is an attempt, on their part, to monopolize cotton, and to destroy a rival in commerce and manufactures whom they recognise in our northern states. The effort will fail. The apple which they propose to grasp will be too large for them, and they will lose all they possess. It will French governments, the independence of all their colonies, and the general advance

of England must be a complete union of all Americans, native and naturalized, to save America. We shall make short work with the rebellion, now on our hands .--There will be a call upon the rebes for instant submission, and if, in the prestheir arms, their slaves must do the work. tiny of the slave.

Freedom to the African and the destruction of cotton, will soon be the watchword to save ourselves from being overwhelmed by British armies. In view of the threatening attitude of foreign nations, can there be any excuse for delay in the most vigorous prosecution of the war? Shall we wait till England and France are upon before we move? Will we allow blind conservatism longer to fool us with its vain projects? It is time that the people should speak, and for the government to heed their voice.

REORGANIZATION OF THE PEDERAL SU-PREME COURT .- The Washington corres pondent of the New York Tribune says that Mr. Trumbull will soon introduce into the senate a bill for reorganizing the Supreme Court of the United States. As its provisions are described, this subject would seem to be far less objectionable than some of the others for reconstructing that court. Judge Trumball's plan, it is said, pro-

Confiagration at Charleston. It is confirmed that a large portion of

Charleston has been burned. It was the work of the negroes, who are reported to have organized an insurrection in the interior of the state, which extended to Charleston, and that the people were in great alarm. We do not desire a general insurrection of the slaves in the south, but if one is to take place. Charleston and South Carolina deserve such a retribution more than any other part of the south. The occupation of the whole of the rebel territories by our armies, and the freedom of the slaves, can alone prevent the spread of this Sumter, which had the American flag flyfearful service rebellion. So, it the public insisted upón on advance on Richmond in July, it was because it was feasible and right, and that judgment fully coincided with that of the general-in-chief. At this time there is much imputience in the public mind at the inactivity of our armies, not only on the Potomae, but everywhere, east, west and south. The people expected something to be done, somewhere, before the winter closed, and nothing has yet been accomplished at all commensurate with our large army and its immense cost. > Yours of the 4th instant is just received. Order number "three" was, in my mind, merely a military necessity. Unauthorised persons, black or white, free or slave, must he kept out of our camps, unless we are willing to publish to the enemy everything we do or intend to do. It was a military and not a political order. I am ready to carry out any lawful instructions in regard to fugitive slaves which my superiors may give me, and to enforce any laws which congress may pass, but I cannot make law and will not violate it. You know my private opinion on the policy of confiscating the slave property of rebels in arms. If congress shall pass it, you may be certain that I shall enforce it. Perhaps my policy as to the treatment of rebels, and their property is as well set out in order No. 13 saued the day before your letter was written as I could now describe it. Yours truly, H. W. Forever float that slandard sheet! Where breathes the foe but falls before us? With Freedom's soil beneath our feet, And Freedom's banner streaming o'er us!

Threatening Aspect of Our Foreign Affairs.

The foreign news looks warlike. It is evident that England means to menace our government with a show of her power, to prepare the way for the independence of lican. the southern states. This has been her policy from the beginning-an independ-England for this purpose. The combination against us is a powerful one, and may well startle our people.

Let us look upon these new troubles calmly and resolutely. No man can die but once, and in the sacred cause of national existence and independence, no death can be more glorious. If one-half of our than to quail before the insolence of forus. Let England and France take care i We can raise a storm in the world that will sweep their rotten governments from the earth. The nations have long enough suffered from the tyrauny of these two powers, which are without friends, except the mock friendship which fear produces.

In the great whirlpool which such a war would produce, all nations would be involv- his own. ed, and they would naturally take sides with us against the overgrown and monstrous and England rule the commerce and labor part, to monopolize cotton, and to destroy they recognise in our northern states. The effort will fail. The apple which they propose to grasp will be too large for them, and they will lose all they possess. It will end in the desirnction of the English and French governments, the independence of posed to have been taught at West Point, all their colonies, and the general advance of democratic principles all over the globe.

The first effect of the menacing attitude of England must be a complete union of advance, and hold it? all Americans, native and naturalized, to save America. We shall make short work There will be a call upon the rebes for instant submission, and if, in the presence of the great danger which threatens their arms, their slaves must do the work, We cannot wait for projects of conciliation and compromise to determine the destiny of the slave.

Freedom to the African and the destrucby British armies. In view of the threatoning attitude of foreign nations, can there be any excuse for delay in the most vigorous prosecution of the war? Shall we wait till England and France are upon before we move? Will we allow blind conservatism longer to fool us with its vain projects? It is time that the people should speak, and for the government to heed their voice.

REORGANIZATION OF THE FEDERAL SU-PREME COURT.-The Washington correspondent of the New York Tribuna says that Mr. Trumbull will soon introduce into the senate a bill for reorganizing the Supreme Court of the United States. As its provisions are described, this subject would seem to be far less objectionable than some

Judge Trumbull's plan, it is said, provides that for the New England states, New York and Pennsylvania, embracing ten millions of people three judges, Clifford, Neljudges, Taney, Wayne and Catron, shall continue to sit; while for the western states, new judges shall be appointed, Kentucky and Chio constituting one circuit, Illinois, Indiana and Michigan another; and Wiscousin, Minnesota, Iowa, Missouri and Kansas a third. Conflagration at Charleston.

It is confirmed that a large portion of Charleston has been barned. It was the work of the negroes, who are reported to have organized an insurrection in the intetior of the state, which extended to Charleston, and that the people were in great alarm. We do not desire a general insurrection of the slaves in the south, but if one is to take place, Charleston and South Carolina deserve such a retribution more than any other part of the south. The oc. cupation of the whole of the rebel territories by our armies, and the freedom of the slaves, can alone prevent the spread of this fearful servile rebellion. It would not only quell two insurrections now, but prevent any similar ones in all time to come. An was in the power of any people. If we fail to do right now, the guilt will be ours, and the punishment also. Nations are to perform their duty.

Why Don't the Army Go Ahoad !

" Do you want to drive the administration into another Bull Run?" This is the deprecating question asked by the conservative press-democratic, secession and repub-

So far as we understand the public sentiment which demands a more vigorous polient south supplying her with cotton, and a cy towards the rebels, we answer, No. And manufacturing England to supply the world | we may as well say here that we do not bewith cotton goods. This is the arrange- lieve the administration was driven into the review the troops in this district, on Monment. By some means and for some real first Bull Run fight. It is abundantly son not apparent, France has united with proved that they did not direct the advance upon Bull Run, but that Gen, Scott ordered it, without being compelled to do so. He directed the attack to be made with perfect confidence in its success; so much was he assured of the result that he did not order all the forces from Washington that might have been spared, and neglected to have Patterson's column on hand to assist, which, acpeople perish in battle, it would be better cording to Patterson's own account, might easily have been done. So, if the public eign despots who seek to divide and enslave insisted upon on advance on Richmond in July, it was because it was feasible and right, and that judgment fully coincided with that of the general-in-chief. If he had used every means at hand, and then failed, then there might have been some plausibility in throwing the responsibility upon the impatience of the people, but as he did not the whole responsibility of that defeat is

The Seventh Illinois cavalry regiment ar

rived to-day.

The flag gun-hoat Bouton, and the steamer Thomas Scott, arrived to-night. They were aground, which accounts for the alarm at their non-arrival yesterday. The Essex, and a number of large mortar-boats, are expected to morrow.

The Union flag which, some weeks ago,

Gen. Smith ordered taken down from a se-cession house in Paducah, and which Gen. Wallace ordered kept up, still floats from he house-top.

The rebels at Columbus have two new gun-boats, and have stopped all transports coming from below,

To-Day's Report. [Reported Exclusively for the Daily Gazette.] MORNING DESPATCHES.

BALTIMORE, Dec. 15. We learn from the captain of the Nor-folk boat that he was informed by the captain of the steamer Illinois, which had ar-rived at Old Point from Port Royal, that he passed within six miles of Charleston harbor, at 10 o'clock on Thursday night, and a tremendous conflagration was evidently at its hight in that city. The reflection on the clouds exceeded anything he ever saw, and the whole bay was brightly illuminated. It did not appear like a reflection from smouldering ruins but from a raging con-flagration. This is later than the Norfolk

Day Book's dispatches. WASHINGTON, Dec. 15. The navy department has received dis-patenes from Capt. Palmer, commanding he steamer Iroquois, in which he minutely relates his movements in order to capture the pirate Sumter. The government at Martinique refused to give the Sumter coal, but allowed her to come to St. Pierre, where

The Sumter had been received with courtesy at the seat of government, and Capt. Palmer discovered, to use his own language, this farce of non-recognition of the confederate flag by France and England s played out. He had a correspondence with the government, the result of which was he was referred to a paragraph of Wheaton's International Law, to the effect port until 24 hours after another had left. The Sumter at that time was in port and the Iroquois was obliged to anchor, one

marine league from the shore. The majority of the citizens of Fort Royal were in favor of the Sumter, and there fere anxious for her escape; being French they sympathized with Louisiana, to which was apprehensive and fearful that the Sumter would escape, and wished she was any where else than under French protection, The governor, however, to the distance from shore, which the Iroreasons above stated, the Sumter succeeded in escaping. The Iroquois followed her, ut could not find her.

The transport Melbourne would leave Woolwich for Halifax on the 5th, with 30,-000 sland of arms, a large amount of ammunition, and a hattery of six Armstrong guns. She will be convoyed by the Orphous, a 21 gun frigate. The Warrior would be ready for foreign service immediately.— Her destination depends on the answer from Washington.

Mr. Bright made an elaborate speech on the American question, in which he declined to give any decided opinion in the Trent affair. He believed if the act was illegal that America would make fitting reparation. He strongly condemned the war-like feeling, and scouted the idea that the American cahmet had resolved to pick a quarrel with England. He made an eloquent oration in

sion of judgment.
A letter from Gen. Scott in favor of main-

and America attracts much attention. The exportation of arms, ammunition and lead has been prohibited.

BALTIMORE, Dec. 14, The Old Point boat brings the report of the discovery, and prompt suppression by the military authorities, of a negro insur-rection at Charleston. The account states that the plot was disclosed by the body servant of a military officer, who said that the negroes of the city were to be joined by large bands from the country, who were to come in armed at night. He said the sash factory had been fired by a free negro that he designated, and who has been arrested. A small quantity of arms were found under the floors of the negro cabins. They were all new and in good condition. In another negro's cabin knives and hatchets were found secreted. The greatest consternation prevailed, and families were closing and barring their windows. The fire companies being composed of men who are on military duty, the fire engines were worked by negroes who broke and rendered useless the two best ones. The offices of the Mercury and Conrier are said to be destroyed. Another account states that the negro insurrection broke out in the interior of South Carolina two days before the fire and was still raging, but this last report is not well authenticated. FORT MONROE, Dec. 14.

The Norfolk Day Book gives the following startling intelligence from Branchville, S. C., 16 miles from Charleston, dated Dec. 7th: passengers just arrived report a destructive fire at Charleston. There was a stiff breeze and little water, the fire equalled the largest conflagration ever known on this continent.

WASHINGTON, Dec. 15. The dispatches relative to the action of the British government, which will appear in the New York journals of Monday, were received by the government this afternoon. Notwithstanding the belligerent attitude assumed, there is no disposition on the part of any member of the cabinet to alter the plans or policy of the government assumed in the arrest of Mason and Slideli. The report of the demand of the English government for the surrender of Mason and Slidell causes great excitement. The sen-

timent of defiance is ungovernable.

It is regarded as settled that congress will adjourn on Thursday next for two weeks, to enable the members to pass the holidays at home. No important legislation will be attempted this week, though the ultra republicans are very anxious to pass through a resolution expressive of their views, before congress takes this re-

AFTERNOON DESPATCHES. MILWAUREE, Dec. 16. The following was received by the Euro-

pa from England: A privy council was held at Windsor on aturday. The Observer, a ministerial journal, states that a special messenger by Europa carries a demand from the British government to Lord Lyons, insisting on an apology, or a restoration to the British dag of Mason and Slidell.

The same paper says that large reinforce ments will be sent immediately to Canada. A large ship is now loading with guns and ammunition for them. The Observer says there is no reason why commissioners should not be restored to the ship of a British admiral in the face of 10 or 12 British menof war on the Potomac. Nearly all the pa-pers treat the question in the same spirit. Agitation increases.

The privy council held by the Queen was wise of gunpowder, saltpetre, nitrate of soda and brimstone.

The Times has but small hope of such disavowal, and says it becomes us to prepare for an unfortunate issue in Canade, it ase of war with the northern states. The Times advises Cauada to prepare at

once by disciplining her militia and drilling a volunteer army. Canada should not rely too much upon us or too little upon herself. The Liverpool Courier's extra says that private telegram received there states that the Warrior proceeds forthwith to Annapolis with the British cabinet's ultimatum for

the delivery of the prisoners and reparation. The Post says that it has been decided by the law officers of the crown that the action of Captain Wilkes was an unjustifiable and flagrant violation of the code of nations, and a direct insult to this country, and it is the duty of the government to demand prompt reparation. We can hardly supess as American policy someimes is, that the northern states are seriously disposed to accept a war with England, and says in one month we could sweep all the San Jacintos from the seas, blockade all the northern ports, and turn to a speedy issue the war now raging. This is so obvious that we find it almost impossible to suppose that the cabinet at Washington can commit an act so madly as to reject our positive

The News says there exists an apprehenion that the American government mady contemplates a desperate policy of seeking to fasten a quarrel on England in or-der to gain ground for abandoning the design of subjugating herself.

The Times of the 30th ult., makes the mportant announcement that the cabinet came to the conclusion that the act of Capt. Wilkes is a clear violation of the law of nations, and one for which repar ation must be at once demanded. Sho'd this just demand not be complied with, we cannot doubt that Lord Lyons will be withdrawn from Washington. also says that it was the deliberate purpose of the American government to seize the commissioners, and it is understood that Gen. Scott since his arrival in Paris has declared that their seizure had been the subject of cabinet discussion at Washington before he left. The shipping Gazette believes that if the demand is not complied with, the declaration of war by England is inevitable.

There is no confirmation of the report that one hundred thousand troops are to be sent to Canada.

French journals universally look at the Trent affair with English eyes. The news causes immense excitement at Paris, and the first general impression was that ample reparation must be made to prevent a col-lision. Communications took place between the governments of England and France, and a good understanding on the subject, it is believed, exists. The Paris Patrie asserts that Capt. Wilkes had no right to take the commissioners while on a British mail steamer, and gives a report that Admiral Milne forthwith detailed three war vessels to escort the man established tween St. Thomas and Havans, for the protection of southerners traveiling. Pays and Constitutionel also censure the ection of the San Jacinto.

HEADQUARTERS DEPARTMENT or Missouri.

To Hon. F. P. BLAIR, WASHINGTON :-Yours of the 4th instant is just received. Order number "three" was, in my mind, merely a military necessity. Unauthorised merely a military necessity. Unauthorised persons, black or white, free or slave, must be kept out of our camps, unless we are willing to publish to the enemy everything we do or intend to do. It was a military and not a political order. I am ready to carry out any lawful instructions in regard to fugitive slaves which my superiors may give me, and to enforce any laws which congress may pass, but I cannot make law and will not violate it. You know my prithe siave property of rebels in arms. If congress shall pass it, you may be certain that I shall enforce it. Perhaps my policy as to the treatment of rebels, and their property is as well set out in order No. 13 issued the day before your letter was writ en as I could now describe it. Yours truly, H. W. NEW AND POPULAR STORE

Farming Lands-4th Ward.

RIORDAN & LEECH. Main Street, Janesville.

Owing to the immonse trade we have done since commencement in this city, (a trade which far exceeded our most sanguine expectations,) we have been enabled to add to our already well selected and extensive stock a still greater variety of NEW AND DESIRABLE GOODS.

all of which have been purchased previous to the late advance, thereby giving us the advantage of merchants who have been obliged to pay a far higher rate for goods purchased within the past week or two; we shall there-fere continue to sell at prices which are sure to give satisfaction, and which have given us the character of

The Cheapest Store in Janesville, and which we are determined to maintain during our whole business career.

We call particular attention to our extensive variety of

THE above are First Glass, findly popular, and prompt paying companies. They invite investigation into their condition and edibit business entirely upon their real merits. In point of solvency and reliability and nonrable dealing, they have but five equals, and no superiors. They are founded upon the very best securities bethe world, first class heads and in the world—first class bonds and mortgages upon property in New York and Brooklyn—socurities that tave not, for the past ten years, depreciated below par, and are every way more relimite and permanent than railroad, bunk, and other stocks, which are subject to the fluctuations of the market, and Hable, in times of course as the extensions of the past tenders to become the fluctuations of the market, and liable, in times of panie, as the experience of the past teaches, to become almost, if not entirely, valueless. And while there are Companies entering the field of competition, well entertained to mistead by publishing partial and one-sided states ents of their condition, and without a cosh surplus on land sufficient to reinsure their outstanding risks, the above mained companies always have and keep over and above their capital lines the amount, and in most masances four times, needs for the reinsurance of all their cisks. With such a foundation, and with such a comittion, they claim the right to look with confidence to the public for liberal patronage.

DAILY GAZETTE.

The Victims in Jail at Washington.

The Philadelphia Inquirer of Monday publishes a long letter from a correspondent who has explored the filthy quarters of the Washington jail, gathering full particulars of the condition of the contrabands and other persons who are imprisoned there. We copy:

WRETCHED CONDITION OF THE JAIL. The jail is a miserable structure, devoid of exterior establishments or architectural taste, and designed apparently with a view to dampness and bad ventilation. It was originally built to contain fifty, but now has 250, and there have been at times over 300 confined there, not one of whom but what was said by the physicians to have some contagious disease; and during the last summer, when the weather was warm, most of them had the measles, and a number still have the typhoid fever. The most tell-ing fact is that the doctor, a very humane man is compelled to drug them inside and out, to keep down disease and vermin; and even then he does not succeed entirely.

On each story of the jail is a corridor 20

feet wide by 40 long, with two narrow cells at each end. Opening on this corridor are two stone cells, each 20 feet square. In other portions of the building are narrow passages, five feet wide and 25 feet long, upon which open on three cells. In each of these, only ten feet long and eight wide, ten prisoners sleep, and during the day the whole 30 have merely the liberty of moving through the 20 feet of crowded and fetid passageway, without books, papers, work or any mental distraction beyond the idle works of their companions. On the arrival of a visitor they rush to their inner door, too rejoiced at any novelty to experience

shame at being scanned. Twice a day the inmates, with the exception of the sick, are taken down in gangs into the prison yard, where they partially wash themselves at a pump, and these short moments are all that are allowed, in sum mer, or winter, of fresh air or the light of heaven. In this public space, ablutions of the entire person are rarely indulged in, and the washing of clothes being seldom performed, they drop away in rags, and are filled with fleas and vermin of the most de-testable character. Instead of a private bath-room and plenty of soap, the jail remedy for this latter is red precipitate and mercurial salve, well rubbed on the hair and skin.

In Battle.

"That could scarcely be my nephew," said Giles Gosling, (in Scott's novel of Kenilworth) when he heard his relative praised for great bravery; "for he had not the courage of a hen-partridge." "Oh, many a man finds courage in the

wars," replied the stranger. And many a man, like honest Giles, has been tempted to exciaim, on hearing some familiar name compled with brave deeds, 'There must be some mistake about it! He never had any courage that his friends knew of; and everybody wondered at his spirit when he declared his intention to go

So little do we know these mild-tempered, good-natured fellows around us, whom circumstances have never yet put to the proof. To think of them coolly standing fire, with the blaze of the enemy's guns before them and the bullets whistling around, or to imagine them furiously charging with the PARLOR, CHAMBER AND COMMON FURNIRURE bayonet, seems preposterous.

And it is probable that they scarcely know themselves any better, until the time of trial arrives. We have the honor of knowing several individuals who fought bravely at Bull Run; and their universal testimony is, that-with the exception of the panic, which did not begin with the troops, though it afterwards swept them away-their principal fear was before the engagement. They were afraid they should be afraid. They lacked courage in their own courage. But as soon as the real ter-rors of battle began, their nerves became steady. A strange excitement burned in their veins, and made them indifferent to danger. Men who could never before look upon blood without horror, saw the carnage around them unmoved. They relate striking anecdotes of each other. One youthful student, who had always been noted for his gentle manners, loaded and fired as steadily and with as much precision as if he had been shooting at a mark; and while his comrades were falling around him, at every shot he brought down one of the enemy. Another volunteer suddenly stopped firing in the midst of the action, and pulled off his trowsers. He was asked what he intended to do. He said nothing, but kicked off his drawers. Then putting on his trowsers again, he said—

"Them plaguy drawers have been bothering me all day; and now I shall feel bet-

And resuming his gun, he coolly picked off one of the enemy. We have heard many such personal an ecdotes, which go to show that there is in most men a strong latent courage, which actual danger brings out, and makes heroes of them as much to their own astonish ment as anybody's .- True Flag.

OUR COMMERCIAL TREATY WITH CANADA. -The tone which the journals and authorities of Canada have adopted towards this country, and the menacing warlike prepara-tions in progress there and tauntingly referred to on every possible occasion, demand some decisive notice from our government. There is no greater secession sympathizer than Canada, and no other neutral province harbors so many rebel refugees and treats them to so assiduous a welcome. Congress ought, in view of these facts, to immediate ly repeal our reciprocity treaty with Canada.

TERRIBLE DEATH .- A man named John Champion, who has been engaged as a switchman and car coupler on the Michigan Southern railroad for a number of years, was killed between four and five o'clock yesterday afternoon. He was uncoupling a tender from a car, in motion, and falling, was ran over lengthwise, his body being crushed to a jelly. Coroner James held an inquest last night.—Chicago Journal of 14th. THE LANCERS TO DE FILLED AT ONCE and Ordered to Washington.—A dispatch

to the editor of this paper, from entirely responsible authority at Washington, informs us that the lancers are to be filled up at once, and will be ordered to Wasnington. This settles conclusively any doubt that

No. 2, Standard Shuttle Machine, formerly sold at \$100,

Reduced to \$75.

Singer's Letter A Machine,

Is the best Machine in the word for Family Sewing and Light Manufacturing purposes; Price, (with Hemmer.) and beautifully ornamented. FIFTY DOLLARS.

The Nos. 1 and 2 machines are of great capacity and application for manufacturing purposes.

Our No. 3 machines are especially adapted to all kinds of light and heavy

LEATHER WORK,

in Carriage Trimming. Boot and Shoe Making, Harness Making, etc., etc. They are of extra size, with an arm long enough to take under it and stitch the largest sized dashes. There is scarcely any part of a Trimmers' stitching that cannot be better done with them than by hand; so, too, the saving of time and labor is very great. The table under these machines is 24 inches long, and the shuttle will hold six times the usual quantity of thread. The large machines work as fast as small ones.

We would sak for our Letter A machines, the special attention of Vest Makers and Dress Makers, and all those who want machines for Light Manufacturing purposes. They embody the principles of the standard machines, making like them, the interlock stitch, and are destined to be as celebrated for Family Sewing and light manufacturing purposes as our standard machines are for manufacturing purposes in general.

We have slways on hand

Hemming Guages, Silk Twist, Linen and Cotton Thread on Speols, Best Machine Oil in Bottles, etc., etc.

We manufacture our own Needles, and would warn all persons using our machines not to buy any others. We know that there are needles sold of the most inferi-or quality, at higher prices than we charge for the best. The needles sold by us are manufactured especially for our machines. A bad needle may render the dest ma-chine almost useless. Our customers may rest assured that all our Branch Offices are furnished with the

which is a beautifully illustrated Pictorial Paper. It will be sent Gratis We have made the above Reduction in Prices with the two-fold view of benefitting thepublic and ourselves. The public have been swindled by spurious machines made in imitation of ours. The metal in them, from the iron carting to the smallest piece, is of poor quality. Their makers have not the means to do their work well. They are hid away in secret places, where it would be impossible to have at their command the proper me-chanical appliances. It is only by doing a great busi-ness and having extensive meanifecturing establish-

impossible to have at their command the proper mechanical appliances. It is only by doing a great business, and having extensive manufacturing establishments, that good machines can be made at moderate prices. The best designed machines, Badly Made, are always liable to get out of order, and are sure to cost considerable trouble and money to keep them in repair. The qualities to be looked for in a machine are: certainly of correct action at all raits of speed, simplicity of construction, great durubility and rapidity of operation, with the least labor. Machines to combine these essential qualities, must be made of the best metal and finished to perfect the second operation. We have the ways and means, on a grand scale, to do this.

The purchasers of machines, whose daily bread it may concern, will find that those having the above qualities not only work well at rapid as well as slow rates of speed, but last long in the finest possible working order. Our machines, as made by us, will carn more money with less labor than any others, whether is imitation of curs or not. In fact, they are cheaper than any other machine as a gift.

Threatening Aspect of Our Foreign Affairs.

The foreign news looks warlike. It is evident that England means to menace our government with a show of her power, to prepare the way for the independence of the southern states. This has been ber policy from the beginning-an independ-England for this purpose. The combination against us is a powerful one, and may well startle our people.

Let us look upon these new troubles calmly and resolutely. No man can die but once, and in the sacred cause of national existence and independence, no death can be more glorious. If one-half of our people perish in battle, it would be better than to quail before the insolence of foreign despots who seek to divide and enslave us. Let England and France take care! We can raise a storm in the world that will sweep their rotten governments from the earth. The nations have long enough suffered from the tyrauny of these two powers, which are without friends, except the mock friendship which fear produces.

In the great whirlpool which such a war would produce, all nations would be involved, and they would naturally take sides with us against the overgrown and monstrous monopolis on sea and land by which France and England rule the commerce and labor of the world. It is an attempt, on their part, to monopolize cotton, and to destroy a rival in commerce and manufactures whom they recognise in our northern states. The effort will fail. The apple which they propose to grasp will be too large for them, and they will lose all they possess. It will end in the destruction of the English and French governments, the independence of all their colonies, and the general advance of democratic principles all over the globe. The first effect of the menacing attitude

of England must be a complete union of all Americans, native and naturalized, to save America. We shall make short work with the rebellion, now on our hands .-us from abroad, they do not lay down their arms, their slaves must do the work. We cannot wait for projects of conciliation and compromise to determine the des-

Freedom to the African and the destruction of cotton, will soon be the watchword by British armies. In view of the threatening attitude of foreign nations, can there be any excuse for delay in the most vigorous prosecution of the war? Shall we wait till England and France are upon before we move? Conflagration at Charleston.

It is confirmed that a large portion of Charleston has been burned. It was the work of the negroes, who are reported to have organized an insurrection in the interior of the state, which extended to Charleston, and that the people were in great alarm. We do not desire a general insurone is to take place, Charleston and South than any other part of the south. The oc ous members. cupation of the whole of the rebel territories by our armies, and the freedom of the slaves, can alone prevent the spread of this Sumter, which had the American flag flyfearful servile rebellion. It would not only ling, in latitude 6 north longitude 42, when quell two insurrections now, but prevent he was ordered to heave to and an officer any similar ones in all time to come. An to the Sumter, at the same time the pirate act of justice so easy to perform, and so ran up his rag, hading down the American wide spread in its beneficence, never before can flag. If we hauled and everything valuable taken from fail to do right now, the guilt will be ours, les sovereigns were taken from Capt. and the punishment also. Nations are Briggs, who with his crew, was put aboard punished by the divine law as certainly as the pirate, and the vessel burnt. The individuals who do wrong, or who neglect Sumter sailed northward, not losing steam, to perform their duty. Why Don't the Army Go Ahead ?

So, if the public insisted upon on advance on Richmond in July, it was because it was feasible and right, and that judgment fully coincided with that of the general-in-chief. If he had used every means at hand, and then failed, then there might have been some plausibility in throwing the responsibility upon the inpatience of the people, but as he did not the whole responsibility of that defeat is

At this time there is much impatience in the public mind at the inactivity of our armies, not only on the Potomac, but everywhere, east, west and south. The people expected something to be done, somewhere, before the winter closed, and nothing has yet been accomplished at all commensurate with our large army and its immense cost. This is the ground of complaint. There is no disposition to dictate the place where the blow shall be struck at the enemy, but in the name of all the military knowledge supposed to have been taught at West Point, cannot we find some place where one respectable victory can be achieved? Is there not some point where we can make a real advance, and hold it?

The people do not insist that McClellan shall advance upon Rull Run. He must judge for himself, whether it is best to There will be a call upon the rebels for march up directly in the face of the eneinstant submission, and if, in the pres. my's works at Centerville, and attack him; ence of the great danger which threatens or whether there is not some other waysome flank movement-or whether it is not best to remain without an advance at all, at this particular point. MORNING DESPATCHES.

BALTIMORE, Dec. 15. We learn from the captain of the Norfolk boat that he was informed by the captain of the steamer Illinois, which had a rived at Old Point from Port Royal, that he passed within six miles of Charleston barbor, at 10 o'clock on Thursday night, and a tremendous conflagration was evidently at It did not appear like a reflection from smouldering ruins but from a raging con-flagration. Palmer was apprehensive and fearful that the Sumter would escape, and wished she was any where else than under French protection, as the authorities were throwing every obstacle in his way. The governor, however, repudiated everything unlike friendship in enly to Cupt, Palmer's complaint. Owing to the distance from shore, which the Iroquois was obliged to occupy, and the fact that the bay is 15 miles wide, and for the reasons above stated, the Sumter succeeded in escaping. The Old Point boat brings the report of the discovery, and prompt suppression by nie Peritor, wrecked near Saline Pass.the military authorities, of a negro insur-rection at Charleston. The account states that the plot was disclosed by the body servant of a military officer, who said that the regroes of the city were to be joined by large bands from the country, who were to come in armed at night. He said the sash factory had been fired by a free negro that he designated, and who has been arrested. A small quantity of arms were found under the floors of the negro cabins. They were all new and in good condition. In another negro's cabin knives and hatchets were found secreted. The greatest consternation prevailed, and families were closing and barring their windows. The fire compsnies being composed of men who are on military duty, the fire engines were worked by negroes who broke and rendered useless the two best ones. The offices of the Mercury and Courier are said to be destroyed. Another account states that the negro insurrection broke out in the interior of South Carolina two days before the fire and was still raging, but this last report is not well authenticated.

FORT MONBOE, Dec. 14. The Norfolk Day Book gives the followng startling intelligence from Branchville, . There was a stiff breeze and little water, the fire equalled the largest conflagration ever known on this continent.

WASHINGTON, Dec. 15. The dispatches relative to the action of the British government, which will appear in the New York journals of Monday, were received by the government this afternoon. Notwithstanding the belligerent attitude assumed, there is no disposition on the part of any member of the cabinet to alter the plans or policy of the government assumed in the arrest of Mason and Slidell. The report of the demand of the English government for the surrender of Mason and Slidell causes great excitement. The sentiment of defiance is ungovernable.

It is regarded as settled that congress will adjourn on Thursday next for two weeks, to enable the members to pass the holidays at home. No important legislation will be attempted this week, though the ultra republicans are very anxious to pass through a resolution expressive of their views, before congress takes this recess.

AFTERNOON DESPATCHES. MILWAUKEE, Dec. 16. The following was received by the Euro-

We can hardly suppose, reckless as American policy sometimes is, that the northern states are seriously disposed to accept a war with England, and says in one month we could sweep all the San Jacintos from the seas, blockade all the northern ports, and turn to a speedy issue the war now raging. This is so obvious that we find it almost impossible to suppose that the cabinet at Washington can commit an act so madly as to reject our positive

demands. The News says there exists an apprehension that the American government madly contemplates a desperate policy of seeking to fasten a quarrel on England in or der to gain ground for abandoning the design of subjugating herself.

The Times of the 30th ult., makes the important announcement that the cabinet came to the conclusion that the act of Capt. Wilkes is a clear violation of the law of nations, and one for which reparation must be at once demanded. Sho'd this just demand not be complied with, we cannot doubt that Lord Lyons will be withdrawn from Washington. The Times also says that it was the deliberate purpose of the American government to seize the commissioners, and it is understood that Gen. The news causes immense excitement at Paris, and the first general impression was that emple reparation must be made to prevent a collision. Communications took place between the governments of England and France, and a good understanding on the subject, it is believed, exists. The Paris Patrie asserts that Capt. of Missouri. To How. F. P. Blair, Washington: Yours of the 4th instant is just received. Order number "three" was, in my mind, merely a military necessity. Unauthorised persons, black or white, free or slave, must be kept out of our camps, unless we are willing to publish to the enemy everything we do or intend to do. It was a military and not a political order. I am ready to carry out any lawful instructions in regard to fugitive slaves which my superiors may give me, and to enforce any laws which congress may pass, but I cannot make law and will not violate it. You know my private opinion on the policy of confiscating the slave property of rebels in arms. If congress shall pass it, you may be certain that I shall enforce it. CAPITAL AND SUBJECT.

(THE above are First Class, justly popular, and prompt paying companies. They invite investigation into their condition and calicit business entirity upon their real merits. In point of solvency and reliability and honorable dealing, they have but fore quarks, and no superiors. They are founded upon the very best securities in the world—first class bonds and mortgages upon property in New York and Brooklyn—securities that have not, for the past ton years, depreciated below par, and are every way more reliable and permanent than railroad, bank, and other stocks, which are subject to the fluctuations of the market, and liable, in times of parsic, as the experience of the past teaches, to become almost, if not entirely, valueless. And while there are Companies entering the field of competition, well calculated to mislead by publishing partial and one-cided statements of their condition, and without a cash surplus as hand sufficient to reinsure their outstanding risks, the above named companies always have and keep over and above their capital toric the smoont, and in nost instances four times, needed for the rein-urance of all their risks. With such a foundation, and with such a condition, they claim the right to look with confidence to the public for liberal patronage.

Policies issued without delay, and farms risks for a series of years taken at less rates than can be done by if thal Companies, and a cortainty given instead of an ancertainty. All losses promptly adjusted and paid.
